Professional Experience

Helexium   **Agu 2024 - Present**
Full Stack Developer

- Previously there was no Accounting Accounts module, this module contains all the financial accounting of a company as income, expenses and transactions, together with a partner we took care of this module in the Backend we use C# and for the Frontend Vue 2.
- We worked on a module for electronic invoicing this module allows to create and modify digital invoices as suppliers of the DIAN.

Education

I finished my studies in December 2022, I started in the world of software with a course in an academy called Sintacty, I also did several courses on the LinkedIn Learning platform. In this platform I learned about software development skills and programming fundamentals.
